-

WORK EXPERIENCE

REPRESENTATIVE OPERATIONS

Concentrix Technologies Pvt Ltd | 2024 – 2026

- Conducted quality analysis of operational data and user-generated content to ensure compliance with platform policies and quality standards. Delivered 50+ quality and process review initiatives focused on performance improvement, error reduction, and operational efficiency. Maintained 98% accuracy while consistently meeting turnaround time (TAT) and compliance targets. Analyzed quality metrics, error trends, and operational performance data to identify improvement opportunities and recurring issues. Performed root cause analysis on quality defects and process gaps, supporting corrective and preventive actions. Generated weekly and monthly reports highlighting performance trends, quality scores, error patterns, and key business insights. Utilized Excel, SQL, CMS tools, and reporting dashboards to monitor operational KPIs and support datadriven decision-making. Collaborated with Quality, Policy, and Operations teams to improve process effectiveness and maintain consistency in quality standards. Participated in calibration sessions to ensure alignment in quality evaluation criteria and performance measurement. Identified and escalated high-risk and policy-sensitive cases while ensuring adherence to compliance requirements. Contributed to workflow improvement initiatives by providing analytical insights and recommendations based on quality data and reporting.

EDUCATION

Bharatiya Vidyapeeth Deemed University, Pune (MCA)

Master of computer application in Data science June 2024 – 2026

CGPA- 9.67

INTERNSHIP

- Data Analytics Using Power BI – TechTip24 (July 2026)
 - Data Analytics Job Simulation – Deloitte Forage (March 2026)
 - Data Analyst Internship & Project – YuvaIntern (May 2026 – June 2026)
 - Microsoft Power BI – Udemy (February 2025)
 - Learn Python Programming: Beginner to Master – Udemy (February 2025)
 - Cloud Computing and DevOps – ExcelR (April 2025 – May 2025)
-

PROJECTS

Apparel & Textile Analytics System

- Developed a Python-based analytics solution for apparel and textile market analysis.
 - Collected, cleaned, and integrated multi-source datasets using Pandas and OpenPyXL.
 - Performed exploratory data analysis and market trend identification.
 - Created interactive visualizations and dashboards using Plotly.
 - Conducted market segmentation analysis to identify consumer behavior patterns and emerging trends.
 - Generated analytical reports and business insights to support decision-making.
 - **Tools:** Python, Pandas, Plotly, OpenPyXL, Excel, Google Sheets
-

ACHIEVEMENTS

- **Certified in Data Analytics through Deloitte Forensic Technology Virtual Experience Program**, applying Excel-based analysis to evaluate equality scores and identify potential workplace discrimination patterns. Best Employee of the Year – 2025 Awarded for consistently exceeding quality benchmarks, maintaining high accuracy, and demonstrating strong ownership in Trust & Safety operations.
 - Recognized for strong analytical skills, consistent performance, and potential for higher responsibility within the organization. Top Performer Recognition Acknowledged multiple times for maintaining 98%+ accuracy and meeting productivity targets.
-

STRENGTHS

- Attention to Detail – Consistently accurate in content and quality reviews.
- Effective Communication – Clear in both verbal and written communication, useful for documentation and team coordination.
- Process-Oriented Mindset – Focused on following and improving structured workflows.
- Time Management – Able to meet tight deadlines while maintaining high quality.
- Adaptability – Quick to learn new tools, processes, and policy updates.
- Problem Solving – Skilled at identifying root causes and offering practical solutions.
- Team Collaboration – Works well in cross-functional teams with QA, policy, and operations.
